

BHAVESH JALANDHARA

Front End Developer

+91 8141825382 @ bhaveshahir1210@gmail.com linkedin.com/in/bhavesh8204 Ahmedabad

SUMMARY

Results-driven React.js and Next.js Developer with 2+ years of experience building responsive and scalable web applications. Proficient in modern front-end technologies including React, Next.js, TypeScript, Redux Toolkit, Tailwind CSS, and Material UI. Experienced in developing high-performance user interfaces, integrating RESTful APIs, and delivering end-to-end solutions with a strong focus on performance optimization, clean code, and seamless user experience.

SKILLS

Programming Languages / Frameworks

JavaScript, TypeScript, React.js, Redux, Hooks, Next.js, HTML, CSS

UI Libraries

Bootstrap, Tailwind CSS, MUI

Tools

GitHub, Postman

Soft Skills

Leadership, Effective Communication, Problem-Solving

EXPERIENCE

Front End Developer

Creative Hustlers

03/2024 - Present Ahmedabad, India

- Developed modern web applications using JavaScript, TypeScript, React.js, and Next.js, successfully delivering multiple project milestones.
- Designed and optimized complex features to improve application performance and scalability.
- Built responsive and reusable UI components ensuring compatibility across various devices and screen sizes.
- Gained hands-on experience working with the React.js ecosystem, including Next.js for server-side rendering and optimized performance.

TOPS Infosolutions Pvt Ltd

01/2023 - 03/2024 Ahmedabad, India

- Successfully completed an intensive internship focused on Front-End Development, gaining hands-on experience with React.js.
- Built and optimized front-end web applications with responsive UI components for better user experience.
- Integrated RESTful APIs to enable smooth data communication between the frontend and backend.
- Deployed front-end projects on Vercel and resolved bugs to improve overall performance and usability.

PROJECTS

Women Business Club – Event Management Platform

- Led front-end development of the Women Business Club platform using React.js and Next.js, delivering a responsive and user-friendly interface across multiple devices.
- Built key features such as event creation, ticket booking, group management, and role-based access, improving event management efficiency.
- Integrated RESTful APIs using Axios and collaborated with backend developers to ensure smooth data flow and platform functionality.
- Implemented PayPal payment gateway integration and used Zustand for global state management, enabling secure transactions and efficient state handling.

SmartBallot – Election Management Platform

- Developed an election management platform for universities, colleges, and schools using Next.js, Tailwind CSS, and Material UI, delivering a responsive and user-friendly interface.
- Implemented Redux Toolkit for efficient global state management and integrated RESTful APIs using Axios.
- Built two modules (Admin and Vendor) from scratch, handling UI development, API integration, and core application workflows.
- Deployed the application and optimized performance to ensure scalability and a smooth user experience.

PROJECTS

PROP971 – Real Estate Property Platform

- Developed the complete front-end using Next.js and Bootstrap, ensuring high performance, scalability, and maintainable component structure.
 - Built screens to display multiple projects and detailed property pages, including pricing, location, specifications, amenities, and media galleries.
 - Implemented advanced property filtering (city, district, amenities, project type, status) to help users efficiently find relevant listings.
 - Converted Figma designs into pixel-perfect, fully responsive layouts and integrated APIs to load dynamic project and property data.
-

JLS Accounting – Tax Filing & Accounting Platform

- Developed the frontend UI and core functionalities for a tax filing and accounting platform using React.js and Bootstrap, ensuring a responsive and user-friendly interface.
 - Designed and implemented features for limited companies, partnerships, and individual firms to efficiently manage tax filing, similar to TaxCalc.
 - Built an intuitive dashboard for managing financial records and tax submissions, improving usability and workflow efficiency.
 - Integrated RESTful APIs using Axios and collaborated with backend developers to ensure seamless financial data processing.
-

AI Business Coach – AI-Based Business Analysis Platform

- Developed the complete application UI using Next.js, Material UI, and Tailwind CSS, ensuring a clean, scalable, and high-performance front-end architecture.
- Built a dynamic multi-step questionnaire form with proper validation and error handling to capture detailed user business information.
- Integrated AI-powered logic to analyze questionnaire responses and automatically generate personalized business insights and reports.
