

BHAVESH JALANDHARA

Front-End Developer • React.js • Next.js

Ahmedabad, India • +91 8141825382 • bhaveshahir1210@gmail.com • linkedin.com/in/bhavesh8204

PROFESSIONAL SUMMARY

Results-driven Front-End Developer with 2+ years of experience building responsive, scalable web applications using React.js, Next.js, and TypeScript. Proven track record of improving page performance by up to 40%, architecting reusable component libraries, and integrating RESTful APIs. Adept at converting Figma designs into pixel-perfect UIs and collaborating cross-functionally to ship production-grade products on time. Passionate about clean code, performance optimization, and delivering seamless user experiences.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, React.js, Next.js, Redux Toolkit, React Hooks, HTML5, CSS3

UI Libraries & Styling: Tailwind CSS, Material UI (MUI), Bootstrap

State Management: Redux Toolkit, Zustand, React Context API

API & Integration: RESTful APIs, Axios, PayPal Payment Gateway, Stripe

Tools & Platforms: Git, GitHub, Postman, Vercel, Figma

AI & Developer Tools: Cursor AI, GitHub Copilot, ChatGPT, Claude AI, Antigravity AI

Rendering Strategies: Server-Side Rendering (SSR), Static Site Generation (SSG), Client-Side Rendering (CSR)

PROFESSIONAL EXPERIENCE

Front-End Developer

Mar 2024 – Present | Ahmedabad, India

Creative Hustlers

- Engineered and delivered 5+ production web applications using React.js, Next.js, and TypeScript, meeting all project milestones on time.
- Reduced page load times by ~35% through code splitting, lazy loading, and Next.js SSR/SSG optimizations.
- Built a reusable component library of 30+ UI components, cutting feature development time by 25% across projects.
- Converted 10+ Figma mockups into pixel-perfect, cross-browser-compatible interfaces with 100% design fidelity.
- Improved application scalability by architecting modular, maintainable front-end codebases following best practices.

Front-End Developer Intern

Jan 2023 – Mar 2024 | Ahmedabad, India

TOPS Infosolutions Pvt Ltd

- Built 3+ front-end web applications with React.js, gaining hands-on production experience during an intensive internship.
- Integrated RESTful APIs enabling seamless frontend-backend data communication, reducing fetch errors by 20%.
- Built fully responsive, mobile-first UI components compatible across all major browsers and screen sizes.
- Deployed projects on Vercel and resolved 50+ bugs, improving overall performance and usability by 30%.

KEY PROJECTS

Women Business Club – Event Management Platform

- Led complete front-end development using React.js and Next.js, delivering a responsive platform that improved event management efficiency by 40%.
- Built key features including event creation, ticket booking, group management, and role-based access control (RBAC), supporting multiple user types.
- Integrated PayPal payment gateway for secure transactions and Zustand for global state management, reducing state-related bugs by 30%.
- Collaborated with backend developers via Axios-powered RESTful APIs, ensuring smooth and reliable data flow.

SmartBallot – Election Management Platform

- Built an election management platform for universities and schools using Next.js, Tailwind CSS, and Material UI, achieving a 98% positive usability score.
- Developed two complete modules (Admin & Vendor) from scratch covering UI, API integration, and core workflows, reducing admin overhead by 35%.
- Implemented Redux Toolkit for predictable global state management, improving data consistency and cutting state bugs by 40%.
- Deployed on Vercel with SSR and bundle optimizations, reducing initial load time by 30%.

PROP971 – Real Estate Property Platform

- Developed the full front-end using Next.js and Tailwind CSS with a scalable, maintainable component architecture.
- Implemented advanced property filtering (city, district, amenities, type, status), reducing user search time by 50% and improving listing discovery.
- Converted 20+ Figma designs into pixel-perfect, fully responsive layouts with 100% design fidelity.
- Integrated dynamic APIs to display live project and property data, replacing 80% of static content.

JLS Accounting – Tax Filing & Accounting Platform

- Built the frontend UI for a TaxCalc-style platform using React.js and Bootstrap, supporting limited companies, partnerships, and individual firms.
- Designed an intuitive financial dashboard for tax submissions and record management, improving workflow efficiency by 45%.
- Integrated RESTful APIs via Axios for seamless financial data processing, reducing manual data entry errors by 60%.

AI Business Coach – AI-Powered Business Analysis Platform

- Developed the complete application UI using Next.js, Material UI, and Tailwind CSS with a clean, scalable front-end architecture.
- Built a dynamic multi-step questionnaire with robust validation and error handling, achieving a 95% form completion rate.
- Integrated AI-powered analysis to auto-generate personalized business insights and reports, cutting report generation time by 70%.
